

## Ways to Find a COVID-19 Vaccine

### Where to look

- Sign up for the Vaccine Connector ([mn.gov/covid19/vaccine/connector/connector.jsp](https://mn.gov/covid19/vaccine/connector/connector.jsp)). People who sign up are randomly selected for COVID-19 vaccinations through the Community Vaccination Program.
- See which sites have COVID-19 vaccines: Find Vaccine Locations ([mn.gov/covid19/vaccine/findvaccine/locations/index.jsp](https://mn.gov/covid19/vaccine/findvaccine/locations/index.jsp)). Check or call online at:
  - Pharmacies. Local and national chains are vaccinating people.
  - Health care systems/clinics. At many places, you do not need to be a patient to get vaccinated there.
- Find COVID-19 vaccines near you with VaccineFinder ([vaccinefinder.org/](https://vaccinefinder.org/)). You can sort by vaccine product.
- Check your county's website or call them to see if they offer vaccination opportunities.

### Tips for getting a vaccine

- Check back often for new appointments. You may also have luck looking for appointments at a certain time of day or be able to join a waitlist.
- Know when appointments are released. Some sites release new appointments on a specific day or time; make a note to check in then. You can find this information on their website or by calling.
- Know which vaccination sites you are eligible for. Some sites are still prioritizing earlier eligibility groups.
- Preregister or have information easily available. Some sites let you enter some of your information before looking for an appointment for faster scheduling. Some sites only hold appointment for a short time. Turn on email or text alerts so you can schedule an appointment quickly if one becomes available.
- Be patient. As more vaccines become available, it will be easier to get an appointment.

Even after vaccination, wear a mask and stay 6 feet away from others in public spaces.
