

You're VACCINATED Against COVID-19 ...Now What?

You are considered fully vaccinated two weeks after your final COVID-19 vaccine dose. It takes this long for your body to build up protection against COVID-19. When you are fully vaccinated...

You can:

- Gather outdoors with smaller groups of fully vaccinated people without wearing masks, unless you are in a crowded place, like a sporting event or outdoor concert.
- Gather indoors with smaller groups of fully vaccinated people without wearing masks.
- Gather indoors with unvaccinated people from one other household without wearing masks – if no one in that household, or anyone they live with, has an increased risk of severe illness from COVID-19.

You should still:

- Wear a mask and stay at least 6 feet apart in crowded settings, even when outdoors.
- Avoid medium and large indoor gatherings with unvaccinated people.
- Get tested and stay home if you feel sick.
- Follow any additional guidance at your workplace.

You do not need to:

- Stay home if you have been close to someone with COVID-19, if you got your final dose at least 14 days ago and you do not have any symptoms.
