

## Find My Immunization Record

The Minnesota Immunization Information Connection (MIIC) is an immunization information system (IIS) that combines a person's immunizations into a single record, even if they were given by different health care providers in the state.

Access your or your child's immunization record

---

### **Option 1: Access immunization records through the Docket app**

Easily access your or your family's (1) immunization records through the Docket app. Docket gives Minnesotans with a MIIC record a digital option to securely access their immunization history in MIIC. With Docket, users can see their immunization history from MIIC, check what vaccines they or their family may be due for, see what vaccines they may need in the future, and share immunization records for health, school, travel, and other purposes.

To get started, download the free app by searching "Docket" on the [Apple App Store](#) or [Google Play](#). Or, go to [Docket](#) to download the app.

- [Easy Access to Your and Your Family's Immunization Records \(PDF\)](#)  
Basic steps on how to use the Docket app.

### **Trouble with the Docket app?**

If you have questions about the Docket app (e.g., downloading, finding it in the app store, logging in, etc.) please reach out to [Docket](#) or on Twitter [@dockethealthapp](#). You may also reach out to your mobile phone provider for technical assistance.

### **Not able to access records with Docket?**

If you cannot access your or your family's immunization records through the Docket app, it may be because of incorrect information in MIIC (spelling, other names, old records, missing phone number or email, etc.). You can:

- Contact your health care provider to update contact information in your MIIC immunization record.
- Complete a [MIIC Immunization Record Update Request](#). MDH staff will review the form and update the contact information in the MIIC immunization record. If staff are unable to find a MIIC record, they will contact you. Requests will be processed in the order they are received.

After your MIIC record is updated, retry your search in Docket by selecting the plus (+) sign on the "Immunization Search History" screen.

Using Docket is optional. If you would like to access your immunization record another way, please refer to option 2 below.

(1) Your family's immunization records refers to records for a person you are the parent/guardian of. You cannot request a record for your spouse/partner.

#### **Option 2: Submit a request to MIIC**

To request your personal MIIC record, or the record of a person who you are the parent/guardian of, complete a [MIIC Immunization Record Request](#). Requests will be processed in the order they are received. **Due to a high volume of requests, if you need a copy of your immunization record within the next 28 business days (6 calendar weeks), please contact your health care provider.**

A parent or legal guardian can request records for children under the age of 18 years. Individuals over the age of 18 years old must request their own record. You **cannot** request a record for your spouse/partner.
