

## Long COVID: What We Are Doing to Learn More

### At MDH

---

MDH currently has funding under a two-year health equity grant from the Centers for Disease Control and Prevention (CDC) that will help us understand the impacts of long COVID on Minnesotans and communities disproportionately impacted by the COVID-19 pandemic. This emerging work is an extension of the pandemic response and recovery efforts. We may expand these efforts as more resources become available.

The Long COVID program at MDH is supported by the CDC and the U.S. Department of Health and Human Services (HHS) as part of a two-year annual financial assistance award totaling \$900,000, with 90% funded by CDC/HHS and \$100,000 amount and 10% funded by the State of Minnesota. The contents are those of the author(s) and do not necessarily represent the official views of, nor an endorsement, by CDC/HHS, or the U.S. Government.

### Minnesota and beyond

---

Many research efforts are underway to improve our understanding of COVID-19. Visit [COVID-19 Research Studies in Minnesota](#) to read about clinical trials and other studies that are recruiting participants from Minnesota, including recruitment for the study of long COVID. Note: MDH is providing links to help people find opportunities to be involved in research studies that may apply to them. MDH is not involved in, nor endorses these research studies.
