

## **Mall of America COVID-19 Vaccination Site Closure**

The Mall of America state-run vaccination site will close after Dec. 30. This state-run site, along with others that were stood up during the response, provided vital vaccination access to Minnesotans of all ages over the last couple of years. COVID-19 vaccine will continue to be widely available through health systems, pharmacies, local public health and community organizations across the state as the COVID-19 emergency response work transitions back to regular health care and public health operations.

Vaccination remains one of the most important ways to protect yourself and others from COVID-19. We recommend everyone 6 months of age and older get vaccinated, including getting an updated (bivalent) COVID-19 booster when eligible. Learn more at [About COVID-19 Vaccine](#).

People hoping to get a vaccine at the Mall of America location can still make an appointment or walk-in during regular hours of operation (Wednesday – Friday from 1-8 p.m.) through Dec. 30. For additional places to get a COVID-19 vaccine, Minnesotans can go to [Find COVID-19 Vaccine Locations](#)
